You can choose to do the quiz any time before the deadline. Once you get started on the quiz, you will need to complete the quiz within the time frame specified. Each quiz offers you a unique opportunity to test not only your understanding of the course material but also your ability to analyze and solve problems. An important aspect of problem-solving is the necessity of selecting an answer in the face of uncertainty about the facts or requirements in the problem. There is a total of 7 quizzes.

**Group Case Assignment:**

Cases, which are often relatively unstructured (i.e. an explicit statement of what the problems are, is not necessarily provided) are used to develop judgmental competence through the analysis of complex issues in a somewhat realistic environment. The technical aspect of such issues often can be solved only after you have addressed and solved the judgmental aspects of the case.

The group case assignment will account for 15% of the total marks. The class will be divided into groups of 7-8 students based on the enrollment at that time.

The assignment has 2 components. One component is for each group to analyze an assigned case that deals with the accounting issues discussed in class. The structure of the case analysis should follow the CPA way of case writing requirement. This maximum page limit for this portion of the report should not exceed 8 pages excluding figures, tables, appendices, and references.

The second component is to compare 2 publicly traded Canadian companies relating to the same industry as the written case analysis. Details of these companies as well as their financial information for the most recent year will be posted in Moodle. You are to decide which one of these 2 companies you believe is financially stronger. For this component, you are required to complete a thorough financial analysis of these 2 companies over the last five years. These financial information can be obtained from their published financial statements from the last 5 years or you should search through Google or Yahoo Finance or other sources to seek the

---

information. These financials should be uploaded into a data analytics platform (such as Excel, Power BI or Tableau, etc). Your final report for this component should consist of no more than 5 pages of written report that identifies your financial and strategic analysis to support your decision. The discussion should also cover a brief overview of key accounting principles used to come up with their financials and whether or not you believe these accounting principles truly reflect the business or the transactions. The final portion of this report should also include 3 pages of powerpoint slides that present your financial analysis visually – These can be in the form of tables, bar or line charts, etc. Please use excel, Power BI or Tableau, etc to come up with these visuals.

More detailed guideline will be provided in class. Peer evaluation may be conducted to ensure all members contribute equally to the assignment. It is recommended that you work together with your team members, and that each student contributes to the group assignment.

The written report must be typed, single sided and 1.5 lines-space with 1” margin. Please also include a cover page that outlines the names of your group member, student numbers and also the section number.

Students will find that one of the main challenges will be the presentation of a thorough analysis in a very limited space. Consequently, you should make the assumption that the marker has read the case and that there is no need to fully describe the contents of the case. Rather, identification of issues and specific recommendations are the major concern, using case facts to add support. Your professor will discuss the “case method” before the first case is submitted.

**Case Quiz:**

The case quiz represents 15% of the overall course grade. Students will be provided a mini case and are required to adopt the CPA way of case writing in preparing a case report to address all the issues presented in the case within a 90 minute time frame. More detailed information will be provided by the instructor in class.

**Exams:**

Mid Term exam represents 20% of the overall course grade and final exam will be 30% of the overall marks. The mid term is a 2 hour and final a three hour, closed-book and on line exam. Midterm exam covers Chapters to date, and final exam is comprehensive. The exam contains multiple choice questions and problems. See course schedule for exam time and dates. More detailed regarding the on line exam will be provided by the instructor in class.

There are **no make up exams or alternate sittings of mid term exam**. If you are unable to attend because of illness, a signed Attending Physician Statement (APS) is required. With a documented excused absence, you may transfer the weight of the mid term to the final examination. If you are ill and it is affecting your performance, do not write an exam; instead go a medical clinic and request a signed Attending Physician Statement (APS). Please see Appendix A: Administrative Information for further details. **Under no circumstances is the result of an examination changed once it is written.**
