

YORK UNIVERSITY

LA & PS
DEPARTMENT OF ECONOMICS

Summer (S2) 2023

AP/ECON 1540 3.0 M: Mathematics for Economists II

MW 16:00 - 19:00, in person, Class Location: DB 0010 (Mon), DB 0006 (Wed)

Course Instructor Contact

Instructor: Vassilios Bardis
Office: DB 2020
Email: vbardis@yorku.ca
Office Hours: on Zoom (TBA)
Course website: on eClass.yorku.ca

Course Description (prerequisites/co-requisites):

This course extends the analysis of basic Economics ideas, topics and problems begun in AP/ECON 1530 3.00. Again, relevant mathematical ideas and techniques are recalled and/or derived so as to provide a deeper understanding of Economic issues and how they can be resolved. The issues and problems covered require functions of more than one variable for their resolution. The notion of Quantity Supplied is combined with the notion of Quantity Demanded and notions of Market Equilibrium are introduced and discussed. Equilibria are evaluated through the introduction of mathematical notions and properties of systems of equations, eventually in matrix form. A deeper understanding of theories of demand (supply) and the foundations of demand (supply) functions is developed through the introduction of mathematical notions of unconstrained and constrained optimization and linear and nonlinear programming. As in AP/ECON 1530 3.0, many topics and issues are addressed and problem framing and problem solving abilities are enhanced.

Prerequisite: AP/ECON 1530 3.00 or equivalent.

Prerequisites/Co-requisites: AP/ECON 1000 3.00 or AP/ECON 1010 3.00, or equivalent. Note: No credit will be retained for this course for students who have successfully completed or who are currently enrolled in SC/MATH 1021 3.00, SC/MATH 1025 3.00, or SC/MATH 2221 3.00.

Course credit exclusions: SC/MATH 1505 6.00, SC/MATH 1540 3.00, SC/MATH 1550 6.00, GL/MATH/MODR 2650 3.00. Note: Acceptable course substitutes are available in the Calendar.

Grading

The course grade will be based on a **midterm exam** and a **final exam**. (Both exams will be held in person.) There are no deferred term tests. There will be a deferred final exam for students who qualify (see below).

The course grade will be calculated as follows. Let M and X denote the midterm grade and the final exam grade and Y denote the course grade (each grade out of 100). Then the course grade, Y, will be
$$Y = \max (0.35 M + 0.65 X , X).$$

Final Exam

The final exam will be comprehensive and will be held during the examination period on the date and time scheduled by the University (to be announced). The opportunity to write a deferred exam will be available to students for whom a religious observance coincides with the date of the final exam or who are unable to complete the exam due to reasons beyond their control. If this applies to you, please email me to let me know.

After the date of the final exam, students who did *not* attend the final exam must request deferred standing by completing the required mach form. This information is available on the department website at <https://www.yorku.ca/laps/econ/undergraduate-programs/academic-resources/department-policies/deferred-standing/>

Reappraisal of Term Work

It is strongly recommended that reappraisal of students' term work should be completed during the course of the term and prior to the submission of final course grades.

Note on Senate Policy on Academic Honesty

Conduct that violates the ethical or legal standards of the University community or of one's program or specialization may result in serious consequences. Please familiarize yourself with the meaning of academic integrity by completing SPARK's [Academic Integrity module](#) at the beginning of the course. Breaches of academic integrity range from cheating to plagiarism (i.e., the improper crediting of another's work, the representation of another's ideas as your own, etc.). All instances of academic dishonesty in this course will be reported to the appropriate university authorities, and can be punishable according to the [Senate Policy on Academic Honesty](#).

Note on the use of Electronic Devices: All electronic devices must be turned off during class (lectures and tests/exams). Audio/visual recordings of any type are not allowed. Only simple calculators are allowed during tests and exams.

Topics

(A detailed list of topics will be available on the course website on eClass.)

- a. Linear Algebra
- b. Functions of several variables
- c. Multivariable Unconstrained and Constrained Optimization

Course Textbook (Optional but Strongly Recommended)

Essential Mathematics for Economic Analysis, fifth edition, Knut Sydsaeter and Peter Hammond with Arne Strom, Prentice Hall.

Note on the use of Electronic Devices

All electronic devices must be turned off during class. Audio/visual recordings of any type are not allowed. Only simple calculators are allowed during tests and exams.

Some Important Dates

Classes start / end	July 4 / August 15
Last date to add a course without / with permission of instructor	July 10 / July 17
<i>Last date to drop course without receiving a grade</i>	<i>July 24</i>
Course Withdrawal Period (withdraw from a course and receive a “W” on the transcript)	July 31-Aug. 15
Examination Period	Aug. 17-24
Reading Week	N/A
Holiday (University Closed)	July 3, August 7
